A. J. RITTER,  
W. H. RUTTER.

## FROM NEW MEXICO.

Silver City New Southwest.  
A postoffice has been established at Paschal, with John W. Fleming as postmaster.

We hear that a steam road wagon is to be put on between Silver City and Deming.

A postoffice has been established at Lone Pine Valley, Mogollon road, with J. K. Holt as postmaster.

The vault in the county building has been fitted up with convenient receptacles for the records, and the valuable books and papers are no longer in danger from fire.

Our county officers did a pretty piece of work last week in the capture at Eureka of Jos. C. Robinson, wanted in Reno county, Kansas, for stealing thirty head of stock a short time ago. Sheriff Hendricks of Reno county, and Whitehill and his deputies did the work.

J. R. Fraser, who absconded from this town about a year since, owing large sums of money, is now a resident of Tombstone, and according to Tombstone papers is on as low a level there as he was here. We would inform the Tombstone papers that Fraser is unworthy of confidence.

**Gold Notes from Dos Cabezas.**  
We positively decline to glance over any more contributions on spring. The poetry sent in this week is too utterly too for publication.

Mr. [redacted] took his departure last Thursday feeling very favorably impressed with our mines and the future of Dos Cabezas.

Mr. A. M. Ellsworth, formerly superintendent of the Eureka Consolidated, and a man of much experience generally, is in town, and intends doing the camp thoroughly before leaving. We find him a pleasant gentleman, and hope he may see something to suit him.

Some seventy five tons of very rich ore have been hauled to the mill from the Eldorado mine at Silver Camp, and about one hundred tons from the famous Mina Chiquita mine. Returns will soon come in from these shipments, and then the boys will put on a larger force.

From the number of strange faces that greet one on our streets, we infer that the boom which has been so long looked for and expected by our citizens has commenced in earnest. It is at least evident that nearly all of the strangers are men of wealth and influence, which, without doubt, means business for Dos Cabezas.

From Mr. Nash we are pleased to learn that Captain Blenheim, president of the Commonwealth company, now in San Francisco, is on the road to a complete recovery from his recent dangerous and prolonged illness.

The captain has many interests here, and is generally recognized as a true friend and well-wisher of the camp.

Messrs. Howard and Burt have sunk a shaft fifty feet on their valuable mine, the Adriatic, located on the north ledge, the ore at the bottom being of a high grade and the vein five feet in width. It is their intention to drift east and west from the fifty-foot level and stoppe out several hundred tons of ore, which will be assayed and taken to the mill and worked.

The stamps in our new quartz mill were set in motion last Monday, and have been running without intermission ever since. All of the machinery moves with precision, and there is nothing needed to render everything perfect. Ore is being hauled from two or three mines, and as many more are being worked for the purpose of supplying the mill, so there need be no fears of its stopping for want of rock.

Operations on the Juniper mine have been somewhat changed for the present. They have ceased work on the tunnel and commenced taking out ore from the old workings to haul to the mill. The ore is of a very rich quality, and eight tons per day are being extracted. After about two or three hundred tons are taken out, work on the tunnel will be resumed, when they expect to strike the main ledge at a distance of twenty feet from where they left off working.

**A Trip to the Vekol and Other Mines.**  
From the Florence Enterprise.  
It is hardly necessary to say that in going to the Vekol you have to pass the railroad at Casa Grande. From there, some twenty and more miles over a level country, and then some ten miles winding through the hills coming out on the west side of the range in which the mine is located. On my arrival at the mine I was most hospitably received by the Walker brothers. These gentlemen also gave me the privilege of examining their mine. This I did as thoroughly as present developments permitted. There has already been a large amount of work done on the mine, yet so well and fortunately has this work been done that it shows a combined plan for the better development of this grand property. On the mine there are a number of shafts and drifts, in none of which has the ore been taken out in the drifting or sinking. Every place now open on the Vekol mine shows ore in quantity. The dumps are all crowded with second-class ore, the first-class having been sorted and shipped, and every shipment has improved in quantity and value. I remained several days at the mine and from day to day watched its progress, and although I do not pretend to be an expert, yet I do pretend to some practical knowledge of mines and mining.

and I can safely say that it takes time to comprehend the magnitude of such a deposit as is being opened by these fortunate owners. Yet, at the same time, I would say that in my opinion this mine is yet in its infancy. From the peculiar nature of the formation and general surroundings we may at any moment be called upon to testify to another of Arizona's grand bonanzas.

**Governor Tritle Heard From.**  
From the Phoenix Gazette, March 4.  
Last evening at half-past seven the band began playing in front of the Bank Exchange hotel, and a large number of our citizens assembled to pay their respects to Governor Tritle. This gentleman appeared on the balcony and was introduced by Judge De Forrest Porter, and proceeded to make a few appropriate remarks. He gracefully acknowledged the compliment tendered by our people, and trusted that they might never have cause to regret it. He stated that President Arthur had seen fit to give him the appointment of governor of this territory, and he would endeavor to faithfully perform the duties of the office; that he appreciated the importance of the position that Arizona was assuming. The governor then informed our people that if they had any requests to make of the executive he desired that they would approach him direct, and not through middle men. The governor stated that he had taken up his residence in Tucson, and that he would probably remain in Prescott only at such times as his duties make it necessary. The speech was a model of modesty, and it is evident that Governor Tritle is willing to stand on his merits, free from rhodomontade. At the close of the governor's speech, short and telling responses were made by Judge Porter, Judge Tweed, C. A. Luke, I. H. Cox, A. C. Baker, Ed. Porter and Jos. Campbell.

**Florence Notes.**  
From the Florence Enterprise.  
Eight bars of bullion from Globe passed through here Tuesday.

Seventeen bars of bullion from Silver King passed through here Thursday, on the way to San Francisco.

Mr. Aaron Mason will build a telephone line between his residence and the telegraph office soon. He is bound to have all the modern improvements and conveniences.

The Pinal Consolidated company is still delayed in the erection of its smelter and buildings by the slow arrival of the material now coming from Casa Grande, the latter occasioned by the scarcity of freight teams.

General Manager Linkton, of the Pinal Consolidated, has gone up to Deer Creek coal fields, and to the South Pioneer sawmill. He will take a look at the entire country in that section before his return.

The Lewis Mining company, composed of officials of the Central Pacific Railroad company, has bought a half-interest in the Sunset and Cow-boy claims at Mineral Hill, and will commence work on them next month.

We are indebted to Mr. Harry Holburn, of the South Pioneer mine. The ore sparkles with virgin silver and gives average assay returns of \$1,000 to the ton. The new strike was made on the 100-foot level, and the ore body is five feet in width and shows the same wonderful richness all the way across. There is no disputing the fact that the South Pioneer is a marvelous silver mine and will soon assist in swelling the bullion out-put of Arizona.

**Sale of a Mine.**  
E. S. Junior, well and favorably known from one end of the territory to the other, has sold his flux mine to Monroe Salsbury and others for \$25,000, some \$3,000 of which he has already paid in Prescott. The old mine is a veritable bonanza but Mr. Junior needed money to develop his Bradshaw mines, which are among the best in Arizona. The mine sold by him is between Jassayampa creek and the Vulture mine. Junior has earned this "stake," and we are glad he has secured it.—Prescott Courier.

**The Weekly Epitaph is now ready, and for sale at this Office and at the News Stand.**

**Notice to Debtors.**  
OWING TO THE DESTRUCTION OF MY business by the burning of the Way Up Lumber House, 725 Allen street, and in order that I may rebuild the same, I request that all those indebted to me come forward and settle their bills immediately.  
Tombstone, March 6, 1882.  
C. C. BLAIR, m61w

GEO. R. RICE, General Manager. C. W. GOODALE, Superintendent.

**VIGORIT POWDER!**  
JUDGE FIELD OF THE U. S. SUPREME COURT DECIDED, OCTOBER 12, 1880, THAT Vigorit Powder is no infringement of the Giant Powder patents, but on the contrary "is no respect within their contemplation." It is ludicrous as well as libelous therefore to term this powder an adulteration or imitation of any scientific inferior.

**Experience and use have proved for the Vigorit Powder:**  
1st.—That it is a safer powder for transporting and handling than the other Nitro-Glycerin Powders heretofore made.  
2d.—That with an equal explosive power it is very free from harmful fumes.  
3d.—That it is much less affected by heat cold or moisture.  
4th.—That it can be tightly tampered without risk of explosion.

**Risks of Accidents Will Be Very Greatly Lessened,**  
if not altogether overcome, by a general use of this powder in the mines. "We have yet to hear of a single human being who has been injured by it."  
The Vigorit Powder Company manufacture on the most scientific principles three grades of powder, known as Nos. 1, 2 and 3 respectively, designed for the different classes of blasting, and warranted to be superior to any powder in use. The prices for Vigorit will be the same as are asked for the corresponding grades of Giant and Hercules.

Best quality of Pure, and Single, Double and Triple Force Caps sold at lowest rates.  
Send for pamphlet showing methods of testing the different qualities of all powders, their relative strength, safety, etc. No comparison based upon scientific inquiry or actual use is feared.

**CALIFORNIA VIGORIT POWDER COMPANY.**  
ENGLISH & WRIGHT, Agents. 327 PINE STREET, SAN FRANCISCO
